For NRTCCA 2026, Datapath, Daktronics, and Fountainhead Control Rooms have joined forces to present a complete vision of the modern control room. Each partner brings unique expertise that, when combined, creates a powerful and seamless environment for mission-critical operations.

Together, our partnership showcases how complementary technologies and design come together to provide fully integrated, future-ready control room solutions. From displays and visualization, to operator comfort and system management, we are united in helping organizations make critical decisions with clarity and confidence.

Jefferson County Emergency Operations Center - Golden, CO

DYNAMIC REAL-TIME CRIME CENTER DVLED DISPLAYS

Command and control rooms manage a plethora of information data from a wide range of systems. These command center's depend on reliable and secure technology systems to present a real-time picture of sensitive data that informs decisions with far-reaching impact. LED video walls provide value to these applications in many ways:

- Communicate important information to teams
- Make critical decisions faster and more efficiently
- Run effective briefings and strategy meetings
- Gain a shared understanding around important topics

Intelligence and surveillance-led policing plays a key role in meeting crime reduction objectives. RTCC's are choosing Daktronics' dvLED video to monitor and respond to crimes in real time by providing a single picture of different live camera feeds and data visualization. Plus, with many of these applications being low light conditions, Daktronics pure pixel processing provides clearer imagery when black and white camera content from remote cameras or drones are studied.

ABOUT DAKTRONICS

Daktronics was founded in 1968 in Brookings, SD where we maintain our corporate and permanent manufacturing presence in the USA. We are publicly traded on the NASDAQ: DAKT and feature 600,000+ sq. ft. of combined USA manufacturing space in Brookings, SD, Sioux Falls, SD, and Redwood Falls, MN. We pioneered the first large-scale LED video display in 1997 – and have been producing indoor and outdoor LED display products ever since.

Daktronics NPN Chip-On-Board video products are in full production in Brookings, SD and can handle projects of any size, scale or quantity. In addition, our in-house testing, and image quality laboratories allow us to constantly innovate more robust and reliable LED video products for our customers. DAKTRONICS

COMMAND, CONTROL, & CONFIDENCE FOR EVERY RTCC

Law enforcement agencies are turning to Real-Time Crime Centers to respond faster, cover more ground, and give officers stronger support in the field. Inside an RTCC, vast amounts of information stream in from cameras, sensors, databases, and other sources. The challenge? Making all that data clear, accessible, and actionable. **That's where Datapath comes in.** We unify your critical systems into one customizable, easy-to-use view, giving operators the clarity they need in high-pressure moments.

A Powerful, Scalable Platform

Our complete RTCC solution delivers centralized management, control, monitoring and automation—tailored to RTCCs of any size or complexity. Whether you're building a small, agile RTCC for a local agency or scaling up a large, multi-agency operation, Datapath's solution is the ideal foundation.

Unified, Scalable Visualization

Our RTCC solution gives each operator a personal video wall, uniting live CCTV, LPR data, maps, dispatch feeds, and drone footage—everything in one clutter-free view.

Security and Continuity

Safeguard sensitive RTCC data with robust security, air-gapped access, and redundancy to ensure integrity and continuity in high-stakes events.

Operator Empowerment

Put operators first, reduce cognitive load and stress with full control and instant access to critical data—boosting morale, engagement, and retention. Datapath make any RTCC smarter, faster, and more resilient. By placing critical information at operators' fingertips and eliminating friction in workflows. Datapath enables safer communities through better-informed decisions and more effective policing.

ABOUT DATAPATH

Datapath is a world leader in video processing, multi-display graphics, and video capture technologies. Since 1982, they have delivered a comprehensive range of solutions designed to meet the needs of any video capture, processing, distribution, or multi-display requirement. With their latest Aetria solution, Datapath offer a scalable connectivity solution for content distribution, display, and control, for critical control room environments. FUTURE OF CONTROL ROOMS & MISSION-CRITICAL SPACES

Fountainhead Control Rooms delivers turnkey design-build solutions for control rooms, command centers, Real-Time Crime Centers, 911 dispatch centers, and other mission-critical environments. From planning and design to construction, custom consoles, AV and technology integration, and installation, we manage every phase as your single accountable partner.

With expertise spanning control room furniture, video walls, visualization systems, operator workflows, integrated technology, and supporting infrastructure, we create environments where people, technology, and information work together to improve communication, situational awareness, and decision-making.

From new Real-Time Crime Centers to renovations and technology upgrades, we help agencies create environments that improve situational awareness, accelerate information sharing, and support faster, more informed decisions during critical incidents.

ABOUT FOUNTAINHEAD CONTROL ROOMS

- We specialize exclusively in mission-critical environments where reliability, collaboration, and real-time decision-making are essential.
- Our turnkey design-build approach integrates room design, custom consoles, AV systems, technology infrastructure, raised access flooring, and installation into one coordinated project.
- Every environment is designed around operator workflow, ergonomics, sightlines, and future technology requirements to maximize long-term performance.
- As a Veteran-Owned Small Business, we are committed to delivering purpose-built environments with **one contract, one team, and one accountable partner.**
